

Next-generation mobile surgery

Designed & Produced
in the Netherlands

More efficiency. Extra comfort. Lower costs.

Mobile surgery offers many advantages. Not only does it save time, it also reduces the physical load for personnel. These benefits are mainly realised because changing beds is no longer necessary. This provides better working conditions and lower costs, whilst also offering the patient considerable extra comfort.

Developed and produced in the Netherlands, ACE Ophtha is a viable answer to current needs and challenges in healthcare. ACE is the best possible choice for the disciplines ophthalmology, ENT, oral and plastic surgery. For patients as well as nursing and surgical teams.

No more
changing beds
